

Table 1: Data Scientist consultancy service for period 02.02.14-02.03.14

Task name	Duration
Function to compare id invariants	16h
Algorithm schema for the math model	28h
Support for algorithm's implementation	12h
Improve household building with location strenght	6h
Function improvements of households comparison	2h
Validate and analyze built household	29h
Build reference household db with non-formal methods	26h
Discover alien blocks against household reference db	8h
Empirical determination of the differences coefficient for the comparison function of ip-blocks, TimeAccuracy coefficient and DistanceAccuracy coefficient	13h
Base hours	108
Overtime hours	32
